

AppGraph

Meta-tool that renders every project's architecture graphs

Portfolio

Proud

Repo / Path	asadbek/appgraph
Domain	Developer tooling / data visualization
Stack	Next.js 15, React 19, TypeScript, Tailwind v4, d3-force/drag/zoom, elkjs, jspdf + svg2pdf, Playwright
Status	Working MVP - ~75% complete
Live / Deploy	Not publicly deployed

Overview

An internal hub that renders every other project's architecture graphs (file trees, system topology, app flows) using a collision-free ELK.js layout engine, ingesting the sys-design 4-file diagram suites.

Key Features & Technical Highlights

- Custom ELK.js-based graph layout with d3 force / drag / zoom.
- Ingests 31 app datasets via an npm run ingest (tsx) pipeline.
- SVG + PDF export and a Playwright screenshot script.

Engineering Evidence & Metrics

- 31 ingested datasets; real export and screenshot tooling.

Why It Matters (application / interview talking points)

- Impressive meta-tooling - shows systems thinking and custom graph-rendering engineering.

Honest Caveats

- Local-only dev tool; no backend/auth/tests.
