

Codex Luminara (3D Gallery)

Spherical Renaissance art gallery you stand inside

Portfolio

Proud

Production

Repo / Path	asadbek/3Js/threeJs-codex
Domain	Creative WebGL / gallery
Stack	Three.js, TypeScript, Vite, GSAP, custom lens shader, real webp art + ogg audio
Status	Production - ~85% complete
Live / Deploy	Not publicly deployed

Overview

Stand inside a sphere hung with 13 masterworks; drag to wander, tap to open a folio. Includes an era filter and ambient audio (Fur Elise / Lacrimosa).

Key Features & Technical Highlights

- 13 public-domain art plates; custom lens shader; ambient ogg audio.
- Roman-numeral theme; Vercel config.

Engineering Evidence & Metrics

- 9 files, ~1,863 LOC; sibling to the Interactive Works gallery.

Why It Matters (application / interview talking points)

- Polished, atmospheric gallery - good companion piece to Interactive Works.
