

Codex Luminara

Cinematic art-history web experience

Portfolio

Proud

Repo / Path	asadbek/codex-art
Domain	Editorial / immersive web
Stack	Next.js 15, React 19, TypeScript, Feature-Sliced Design, Tailwind v3 + shadcn, Framer Motion, Zustand, next/image + sharp
Status	Working MVP - ~80% complete
Live / Deploy	Not publicly deployed

Overview

A 'living illuminated manuscript': a scrolling home, an era timeline, a gallery and immersive artwork-detail pages with Ken Burns / parallax motion and ambient audio.

Key Features & Technical Highlights

- Large hand-authored static content (artwork-details ~1,314 lines) with 18 webp backgrounds and 10 audio tracks.
- Keyless Met / Rijksmuseum API fallback.
- Feature-Sliced Design + shadcn; sharp image optimisation.

Engineering Evidence & Metrics

- Substantial authored content and a distinctive, cinematic design system.

Why It Matters (application / interview talking points)

- Strong design + content-engineering showcase.

Honest Caveats

- No DB despite spec mentioning Prisma; an audio-path bug (/music vs public/music2); no tests/deploy.
