Stack	Next.js 16, React 19, TypeScript, Tailwind v4 + shadcn/Radix, Motion v12, Zustand (persisted), i18next, Recharts, Vercel Analytics
Status	Working MVP - ~80% complete
Live / Deploy	Not publicly deployed

Overview

An interactive atlas of the cosmos: an animated solar system plus a searchable catalog of 52 authored celestial objects, each with a detail page (prose, stats, composition charts, facts).

Key Features & Technical Highlights

- 52 fully-authored static objects with SSG via generateStaticParams.
- Complete loading / error / empty / not-found states; persisted 'explored' counter.
- Recharts composition charts; i18n wired.

Engineering Evidence & Metrics

- Substantial authored dataset; complete state handling on every view.

Why It Matters (application / interview talking points)

- Good example of content-driven SSG with disciplined UX states.

Honest Caveats

- i18n wired but currently English-only; no backend/tests.
