

Dijkstra Visualizer (C++/CLI)

Managed-C++ shortest-path visualizer

Portfolio

For-fun

Repo / Path asadbek/code/Project1

Domain Algorithms / desktop

Stack C++/CLI (managed C++), .NET Framework, WinForms + GDI+

Status Working - ~85% complete

Live / Deploy Not publicly deployed

Overview

The C++/CLI implementation of the Dijkstra visualizer, with an animated splash, login and an interactive graph editor.

Key Features & Technical Highlights

- Real Dijkstra with step animation via a Timer.
- Animated splash -> login -> graph editor flow.

Engineering Evidence & Metrics

- ~2,805 LOC (with some dormant orphan files).

Why It Matters (application / interview talking points)

- Shows willingness to work in lower-level / managed-C++ territory - rounds out the three-language study.
