

Dijkstra Visualizer (C# / .NET 8)

Interactive shortest-path visualizer in modern C#

Portfolio

Proud

Repo / Path	asadbek/code/WinFormsApp1
Domain	Algorithms / desktop
Stack	C# / .NET 8, WinForms + GDI+, SHA-256 auth (JSON store)
Status	Working - ~90% complete
Live / Deploy	Not publicly deployed

Overview

An interactive Dijkstra shortest-path visualizer with a full graph editor, the most modern of three language implementations.

Key Features & Technical Highlights

- Full graph editor with animated Dijkstra and equal-cost path highlighting.
- SHA-256 auth guard with a JSON credential store.

Engineering Evidence & Metrics

- ~1,675 LOC; modern .NET 8 stack.

Why It Matters (application / interview talking points)

- Part of a three-language Dijkstra study (C#, Python, C++/CLI) - good general CS evidence and language breadth.
