

FaceScan

Real-time webcam face analysis + recognition

Portfolio

Proud

Repo / Path	asadbek/AI ML/5-project-face-recognition
Domain	Computer vision (applied)
Stack	FastAPI + DeepFace + face_recognition (dlib) + OpenCV; React 18 + TS + Tailwind + Zustand + Framer Motion + i18n
Status	Working - ~85% complete
Live / Deploy	Not publicly deployed

Overview

Real-time webcam face analysis (age / gender / emotion / pose / landmarks) plus identity enrollment and recognition, behind a polished trilingual cyberpunk UI.

Key Features & Technical Highlights

- Integrates real pretrained CV models with graceful dlib-optional degradation.
- 128-d face-encoding registry for enrollment / recognition.
- Polished multilingual (en/ru/uz) animated UI.

Engineering Evidence & Metrics

- Strong product engineering over off-the-shelf CV models.

Why It Matters (application / interview talking points)

- Shows you can integrate and productise real CV models with a refined UX.

Honest Caveats

- Applies pretrained models; limited novel ML.
