Repo / Path	asadbek/DATA/show-data
Domain	CS education / visualization
Stack	Next.js 16, React 19, TypeScript, Tailwind v4, shadcn, Zustand, Framer Motion, Feature-Sliced Design
Status	Working MVP - ~75% complete
Live / Deploy	Not publicly deployed

Overview

An interactive DSA visualizer covering sorting (with audio), a pathfinding grid, and BST / AVL / Heap tree structures.

Key Features & Technical Highlights

- Three real algorithm modules each with their own entities (avl/bst/heap, grid algorithms, sort + sound).
- Global HUD controls; vercel.json.
- A correctness test script (npm run test:sorts).

Engineering Evidence & Metrics

- Real algorithm implementations with a correctness test harness.

Why It Matters (application / interview talking points)

- Demonstrates algorithmic understanding plus the ability to make it visual and interactive.
