Overview

A separately-shipped Flutter fitness/workout app. Only its signed release artifacts are present in this collection; the source lives in a different repository.

Key Features & Technical Highlights

- Bundles a ~2MB exercises.json exercise database.
- Built as a signed Android App Bundle and APK.

Engineering Evidence & Metrics

- Release artifact evidence (libflutter.so + Dart libapp.so) of a shipped app.

Why It Matters (application / interview talking points)

- Demonstrates breadth across native frameworks (Flutter in addition to Kotlin).

Honest Caveats

- Source code is not part of this folder set - artifacts only.
