

STRATA (history-ThreeJs)

'Scroll is time' - fly a 3D timeline past procedural monuments

Portfolio	Proud	Production
-----------	-------	------------

Repo / Path	asadbek/3Js/history-ThreeJs
Domain	Creative WebGL / scrollytelling
Stack	Three.js, TypeScript, Vite, GSAP, Lenis, public-domain art textures
Status	Production - ~88% complete
Live / Deploy	Not publicly deployed

Overview

Scroll is time: the camera flies along a 3D timeline ribbon past six procedural monuments docked to their dates, with lighting and fog re-tinting per century.

Key Features & Technical Highlights

- Procedurally generated monuments; 7 public-domain art plates as 3D textures.
- 'Stratum Gauge' signature UI; OG shells; museum-grade design system.
- 44-file QA harness (the largest).

Engineering Evidence & Metrics

- 6 files, ~1,287 LOC; the most thorough QA harness in the set.

Why It Matters (application / interview talking points)

- Demonstrates narrative design + procedural geometry + strong QA discipline.
