

VANTAGE (cars-ThreeJs)

Scroll-driven 3D car walkaround & configurator

Portfolio	Proud	Production
-----------	-------	------------

Repo / Path	asadbek/3Js/cars-ThreeJs
Domain	Creative WebGL / product viz
Stack	Three.js, TypeScript, Vite, GSAP, Lenis, Draco-compressed GLB
Status	Production - ~90% complete
Live / Deploy	Not publicly deployed

Overview

A scroll-driven car experience: the official Three.js Ferrari glTF is revealed and dissected by scroll - silhouette, exterior, exploded teardown, a live clearcoat configurator and spec telemetry.

Key Features & Technical Highlights

- Draco-compressed GLB with baked ambient occlusion; 8 webp paint swatches.
- Live clearcoat colour configurator; History-API routing; OG cards.
- 14-file QA harness; Vercel config.

Engineering Evidence & Metrics

- 8 files, ~895 LOC; polished product-viz with a real configurator.

Why It Matters (application / interview talking points)

- Great example of product-visualisation craft (the kind of work agencies pay for).
